FALQUI For NDI

VERSION 2.0

Your NDI® control room, in your pocket.

Every NDI source on your network, on your phone. Watch them, listen to them and pick what goes on air: at a conference, at a live sports broadcast, wherever you are on set.

Multiview

All sources in a grid, like the monitor wall of a control room.

Audio in check

Meters on every source, and listen to one source at a time.

CUT and FADE

Studio mode with PREVIEW, LIVE and dissolves.

NDI output

Your program goes back to the network as a new source.

Free · no account · about 10 MB

FALQUI FOR NDI 2.0

A production monitor that is always with you. And a small control room when you need one.

The engineer at the desk, the director on stage, the camera operator on the sideline: with **FALQUI For NDI** everyone sees what they need on their own phone, with no cables and no extra monitors. The app finds the NDI sources on the Wi-Fi or wired network by itself.

Open **studio mode** and you get four previews, PREVIEW and LIVE, cut or dissolve. The program goes out to the network as a new NDI source, **FALQUI LIVE**, ready for vMix, OBS, TriCaster or your recorder.

Automatic discovery
Sources show up on their own, with no addresses to type.

Audio meters
One meter per channel on every source: green, yellow from -18 dB, red from -6 dB.

Pause to save bandwidth
Pause a preview and its connection closes until you resume.

NDI output with audio
LIVE goes out with video and audio, dissolves included.

Multiview and full screen
Tap a tile and it goes full screen at full quality; a strip of thumbnails lets you switch on the fly.

Listen
The speaker button plays one source at a time, so they never overlap.

Studio mode
Four sources per bank, green PREVIEW, red LIVE, CUT and FADE of 0.5, 1 or 2 seconds.

Light on Wi-Fi
Multiview tiles use the low-bandwidth stream; full screen switches to full quality.

Who it is for

- AV rental companies, conferences and events
- Live sports, web TV and streaming
- Theatres, churches, schools and arenas
- Production studios already working with NDI

What you need

- An Android 7+ smartphone or tablet
- Or an iPhone or iPad with iOS 16+
- NDI sources on the same local network
- 5 GHz Wi-Fi recommended

2.0 NEW

One digital signature for every version: from now on each update installs over the previous one, and nothing is lost. Had a 1.x version? Uninstall it once, then install 2.0.

Get the app

www.falquindi.com/en

Android	FALQUI-arm64.apk, for almost every device (armv7 for older ones)
iPhone and iPad	FALQUI.ipa, installed with Sideloadly: instructions on the website
